Hongkong, January 3, 1912. GENERAL BOOTH AT 83.

Visit, to America and a Chinese

Campaign. General Booth, who was eighty-three

on April 13, has sent the following message to the "Daily Mail " :--

" My best wishes for earth and beaven to every reader of "The Daily Mail. At the end of eighty-three years of my pilgrimage I testify to the faithfulness of God, to the true happiness of a life spent in scoking the benefit of others, and to the grand possibilities of goodness which are ever the hope of humanity.

"The span of life which may yet be left to me I purpose to spend in this, the highest service I know. My sight has failed, but I am told that the operation I intend to undergo next month will much restore it, and though there must. be some risk of total blindness. I shall go through. Whether it succeeds or not, I hope to be spared to visit Carada and the United States during the year upon which I am entering, as well as to inaugurate further efforts for the spread of our work in the European countries. "At home my mind dwells specially

on the problems involved in the better housing of the poorest people, and a iore discriminate and extensive distribution of those who could with advantage be transplanted to the land over seas. "In the East China calls to me, and before I pass away I must find men and money that the Salvation Army may play well her part for the vast proportion of the Celestial Empire." Every mail from India brings me news of advance there and tidings of new opportunities for our work of mercy and salvation. I hope "The Daily Mail " will still help me to go forward, and to go forward more vigorously then ever-

"William Booth." General Booth formally celebrated his 83rd birthday by giving a tea party in the Congress Hall; Clapton, to 1,000 London officers of the Salvation Army. Seemingly a Irail old man, his undeunted spirit was apparent when he addressed

dia company. Among the guests were many men and women who had suffered in the struggle of life, and they told each other how they cwed their roscue to the general Evenithe waiters included men who had and laken from the pretchedness of the Business Notices.

MURDER.

London, April 18 .- A verdict of Wilful Sir, -At the close of Count Hayashi's Samuel Henry at the inquest yesterday on the body of his wife, Bertha Mary Henry.

"I asked if I should go for help," them

" About five o'clock next morning he got up and went into the bathroom, where later I saw he was shaving. I prepared him tea and took it to him in his study. I then discretion, but the fact that the authority heard four shots. I rushed upstairs and found the study door locked. I called out, Master, what are you doing?" and he replied. All right, Fanny, go for help. I asked him to open the door, and when I entered and saw him sitting in a chair smoking a cigarette, with blood running down his face, I asked why he had done it. He answered, 'I could not survive themistress; they will arrest me for what happened last night. He had a revolver in his lup. A policeman soon afterwards

at the time the bye laws are framed under "F. Brown," and afterwards a parcel came which Mr Henry told her contained a re-

> carry in into the mistress's room. Why ?-I don't know why I told him to " Asked if she knew Mrs. Henry was ex-

the would commit suicide.

Urban pleasure resorts, it may be added, and laid stress upon the medical opinion. have the same inducement and the same which was to the effect that the wounds in opportunity of protecting the views from the woman's throat could not have been self inflicted, and that the only person in But, though the Act of 1907 is destined the house at the time who could have comto restore to English people the enjoyment mitted the crime was Mr Henry. He of the En lish countryside, it does not thought it was their duty to find a verdict provide corresponding means for securing a of wilful murder a ninst Mr. Henry. This reasonable standard of grace, dignity, and the jury did after a short deliberation. The interest in the aspect of our towns. Rev. Barnuel Henry, it will be remembered, Further powers must be sought, and a Bill fired a revolver in the Lobby of the House for this purpose will soon be introduced in of Commons in February, last.—"China

NERVOUS DEBILITY. ITS PREVENTION AND CURE

DISEASES apart, there is probably not condition held in groater dread by the inhabitants of hot countries than ner-

Everybedy knows the conditions which produce it was every body known the ener vating and depressing effects which

The immediate need of every authorur in, obviously to get better as quickly as possible. This is, however, by no monns an easy matter with the use of the ordinary remedies. The consequence is that men, and women too, find themselves becoming more and more depressed in mind and more weakened in body as the days go by, and they seem farther than ever away from the greatly desired and hoped for

It is not easy to exaggerate the deprevaion this combination of mental physical weakness is capable of producing It may even go to the extent of so unhinging the patient's mind that he socks to put an end to his misery by self-destruction. Happily: modern Science is able to hold out to these unfortunate people not merely a hope, but a promise of cure which amounts to an absolute certainty: rehabilitation of the mental faculties, the South China. revitalization of the nervous functions the complete restoration of the original vigour and vitality, are all obtainable by missins of Sanatogen, which is now universally known both by the medical profession and by the general public as the greatest tonic food in the world. ALWAYS KNOW THE REMEDY

YOU USE. It owes its unique reputation to its remarkable composition, which chemically combines the body-building part of the purest cow's milk with stint salt of phosphorous, which is found in the brain and nervous system. These two, thus intimated ly combined, produce a substance as entirely different from themselves when merely mixed together, as water is different from the two gasos which compose it.

The result of this chemical union in Sanatogen produces a food which does not merely stimulate, but also revitalises and reinvigorates the whole-nervous system, so that no matter how much its power last been diminished it is gradually restored, and keyed, as it wore, to the pitch of per-fect health. With the improvement of nerve and bland, the lustreless eyes become bright, the pallid, waxy complexion takes on the rosy hue of health, the flaceid muscles become strong and firm, and the ever-wearied body becomes vigorous, and permented with an altogether unusual ensation of energy.

In part, some of these, benefits are due to the restored nutrition of the body as a whole, for Sanatogen is so easily digestible that it imposes no strain at all on the weakened stomach and digestive organs. These, naturally, share in the general condition of debility due to the lack of nervous force, and act with their normal vigeur when the nerve force of the body is

Complete evidence of Sanatogen's value in overcoming this curse of nervous weakness is furnished in the following letters from two of the most distinguished women

TWO FAMOUS ENGLISH-WOMEN.

Lady Henry Somerset, the celebrated social reformer, writes :- "Sanatogen un 1912. doubtedly restores sleep, invigorates the The TRANSFER BOOKS of the Comperves and braces the patient to health. I have watched its effect on people whose nervous systems have been entirely undermined, and I have proved Sanatogen to be most valuable."

Even when this nervous condition goes to the extreme length of Neurasthenia, which often threatens the reason and the life of the sufferer. Sanatogen is capable of dissipating the gloom and dispersing the black clouds of apprehensions which overshadow the sufferer's life, and, if persevered with, will restore complete nervous and physical health. In this respect Madame Sarah : Grand, one of the most brilliant woman novelists living, writes !-- "Sanatogon has done everything, for me which it is of the above Company will be held at the said to be able to do for cases of nervous debility and exhaustion. I began to take at 12.30 r.m. on TUESDAY, the 28th it after nearly four years enforced idleness from extreme debility, and now (after only | Accounts to the 31st December, 1911, and four months). I find myself able to enjoy the Report of the General Manager and both work and play again, and also able to Consulting Committee and to elect a Con-

do as much of both as I ever did." With regard to the nervous debility engendered by life in hot climates Mr E. C. Desbrulais, Bankipore, Patna, Bengal, writes':- Sanatogen is just the thing for workers in India, and should always be carried, just as one never goes about without chlorodyne, as it is the only remedy against the awful wear and tear of life in burning tropical climates.

Write for a copy of a most interesting booklet "The Art of "Living," by Dr. Andrew Wilson, which will be sent free toall mentioning this paper on application to TT IS HEREBY NOTIFIED that ME A. Wulfing and Co., 6, Kiukiang Road,

THE ANNUAL MEETING OF THE BRITISH CORPORATION.

At the twenty-second annual meeting of the British Corporation for the Survey and Registry of Shipping held on the 21st ult., at the head office in Glasgow the chairman, Mr. Francis Henderson said: "Gentlemen, this is the twenty second annual, meeting of this society and I am very pleased to be able to tell you that, in spite of the almost total cessation of work in shipbuilding yards during the latter part of 1910, the tonnage built to the classification of the society during the twelve months which ended on January 31 is over 275,000 tons and total tonnage of the vessels which have been built under B.C. special sur vey will shortly reach 3,000,000 tons. The work in hand which is intended to be classed with the Corporation has an approximate tonnage of 460,000 tons, the largest total which has ever stood upon the books of the society. It is a source of gratification to the committee tha 54,000 tons of this total are to be buil also to the classification of the Registro Nazionale Italiano, and that the associa tion of the British Corporation with this work is to be attributed to the close technical alliance with the Italian society which I have alluded to on previous

"The mercantile fleet of the world has been passing through a crisis or period of change during the last three years more important, in my opinion, than anything previously experienced by ship owners. Owing to the altered circumstances of business in nearly all parts of the world, and the development special trades never before operated. became necessary for most of our principal shipowners practically to scrap great deal of their tonnage, which ha become unprofitable owing to reduced rates of freight and increased expenses 3f 0 | overywhere. You will better understand what I mean when I tell you that the number and tonnage of vessels sold to be broken up, dismantled, etc., during 1909 and 1910 was in excess of any provious record, and when the figures fo 1911 come to be added, the total for the athree years will be as nearly as possible

1,000,000 tons. " Mr. Stephen will refer specially. the technical aspect of our work, but the Corporation has now completed, 21 years of active life and may be said have reached the dignity of maturity, not of age, I may, perhaps, se allowed to refer again to the beneficent influence which the work of the Registry has had upon the shipping industry of the worl -influence far more important and wide reaching than is represented by a mere

statement of classed tonnage. "Take, for example, the construction rules of the society. It may be said that; broadly speaking, the main prin ciples, the standards of strength and the control idea of the lines upon which structural development should proceed are still the same as when the first Boo of Rules, was published in 1893. They were then accepted as a great attempt to apply sound technical principles general regulations for shipbuilding, bu when it is realised that their present expression in existing methods of con struction was conceived so many years ago, it will be readily seem that, whi the changes first made may have appear ed to be radical in that they were the result of original scientific investigation as distinguished from the methods of those who went before us, they were really conservative in the respect that they have so successfully stood the test of twenty-one years experience.

".The amendments to the rules, issued from year to year, have been an cutwa expression of the committee's determination to thoroughly test by experience each forward step towards the ultimate and comparatively simple anatomy of the modern steel ship. The economy weight obtained in the early days in the larger classes of ship of the three-deck class, as compared with previously accepted methods, was almost startling. but the ships were absolutely successful. Now that the standard of weight. first established by the British Corporstion has been practically adopted by all registry societies, there must be many

owners who regret that they did not share: partier in the selventages given by B.C. classification, and who must look sorrowfully upon the hundreds of tons of steel fully ripon the numbered of long of size of the size o

" It is scarcely necessary to ramino you of the intimate association of the Corporation with all the modern developments in shipping, but as the Diesel and other types of oil engine are now so prominently before us it may be as well to refer to the work of the sub-committee on internal combustion engines. That committee, personally, and through sepecialists on the staff, have kept themselves in closest touch with oil the latest inventions and improvements in this department, and have issued previsional gules for construction which embody in a tentative fashion existing knowledge but which are, in practice, used only as a basis for interchange of views with designers rather than as regulations because we feel we are a long way still from the inst word on this subject.

"Reference has already been made to the successful voyage of the Toller across the Atlantic, and to the fact that sister vessel of somewhat larger power is now under construction. Success has also attended the auxiliary motor-ship Sound of Jura and two whalers with oil engines, and we are waiting with great interest the results of the trials of the 7,000-ton oil-driven ship Jutlandia, built by Messrs. Barelay, Curle and Co., and the 3,200 cargo oiler built by Messrs. Richardsons, Westgarth and Co., both of which vessels are being built to the classification of this Registry.

"Even more from an educative point of view may come from the development of the fleet of coasters with oil motors. which is being built, under our survey. for Mr. Paton, of Glasgow, because the lessons of experience are most easily applied during the growth from small things

"In whip construction the developments of to-day have gone so far on the road to simplicity, economy and efficiency that one might almost wonder what there left for us to do, but as every week brings some further proposal to be considered by the Technical Committee there is little likelihood of thipbuilding methods sinking "into the letherny of stereotyped practice, and I can wish no better fate for the British Corporation Registry than that it should initiate, and be associated and identified with, all that is best, in ship and engine construction in the future, as has fortunately been the case during the past twenty-one years. Mr. Fred. J. Stephen, chairman of the Technical Committee, said: "The work of the Technical Committee during the past-year has been, as usual, interesting. varied and practical, while it has exceeded in volume anything in past experience. The most important event in our freeboard work has been the consideration of rules for the load-lines to be ussigned to full-rigged vessels fitted with auxiliary steam and oil motors of high power. The committee gave clear expression to their views on the subject. in writing, at the Departmental Committee in London, on which I had the honour to serve, and which is technically

responsible for the tentative rules now issued by the Board of Trade. "Another matter which has been the subject of prolonged investigation and much consideration has been the suit ability of the various compositions which are now so commonly used instead of wood-sheathing on steel decks. There is a strong chemical resemblance between all the compositions, and it has been found that under existing conditions of mixing and laying there is grave risk of serious corresion of the steel "plating being caused, particularly where the covering is exposed to the action of sait water or moisture such as occurs on weather decks. The manufacturers have been invited to assist the committee in laying down regulations which will said guard the interests of shipowners, and

it is hoped that a standard of quality and work may be found which will have this effect, as there is no doubt of the many admirable qualities of these coverings. In speaking of the general work of the Technical Committee, I might also ropust my words of last year, with the addition that the movement towards the simple structure of which I spoke has become more and more determined. By for the in gast proportion of vessels of all classes are now built with increased Dontanued on rule 4.)

premiums.

Manila and the surrounding country says (Continued from page 3.) the Manda Times of May 7, are sufferin. frame spacing, and among all the scant from the "worst drought over known in ing plans which have been considered their history. This fact is established by for the 460,000 tons of shipping to be figures prepared by Father Jose Coronas, built under the rules to which the chairacting director of the weather bureau. man has referred, only half a dozen vest The statistics show the "rainfall this sels can be described as being built on serson to be so far below even the minimum the new old-fashioned side-stringer sys of any previous year since 1865 as to be tem. It is difficult to believe that this large departure, which was made so re-

almost beyond belief. Father Coronas' figures show the averages of rainfull in Manila for each month of the year, from 1865 to May 1, 1912. For a comparison our present dry season with versal practice. It would be difficult to previous years, a period of seven months, from October 1 to May I, is used and the figures shown are startling in the extreme. The record of the seven months ending May 1, 1912, shows rainfall as follows: Cotober 9.7. November 6.1, December 8.0, able as to suggest the hope that the gain January 21.9, February 24.6, March 26, April .08. These figures are in millimeters. Father Coronas - states that the periodof try weather from October, 1911, to end of April, 1912, has the smallest amount of rainfall of any like season experienced in Manita since the establishment of the obstion motors, and it is not necessary for ervatory in 1860. The amount of rain for the me to say more than that, in this as in present dry season is 73.7 millimeters. This amount is 403.8 millimeters below the average of the coven mouth periods; deduced from 46 years of observation. During those 46 years only twice has the

Born 1820:

still going

total rainfall for the seven months been less than 200 millimeters, the minimum being 185.5 millimeters for the period from "The committee have been careful to October, 1876 to April, 1877. The heaviest ce that the staff has been increased in rainfall for the seven month period during the 45 years, was 911.5 millimeters. The present drought, a hewever, scoms to have been confined principally to the months of October and November, and to the scarcity of raise during these two months can be attributed the very low total for the season, as the remaining five months show totals comparing favourably with the general average.

During the 46 years on eight occasions December has shown a smaller total January 20 times, February 40, March 8 and April 6, the six April reports showing no minfall whatever. The fact that Manila is getting probably the very worst of the drought is shown by the fact that the Visavas have had a fair amount of rain recently. Baguio registered

48 millimeters yesterday morning and

Davac, Mindanac, in about one week in

April had about three times the minfull th t the city had in the past seven months, regit tering 200 millimeters. The drop yesterday in the maximum temperature to 93 9 degrees elgred the longest period of greatest heat experienced in Manila for over 30, years—sixteen consecutive days, commencing April 20 and ending May 5, with the maximum temperature above 36C (98.8.F), and but a slight improvement made yesterday. Furthermore no improvement in the

situation is looked for until a shower

Father Coronas, of the Manila observa tory, states that the only relief from the present heat spell is a typhoon, but changes in the wind to the southwest would cause a slight alleviation by bringing in the sea breezes. The highest tempersture experienced during the past 16 days was 37.5 C (99.5 F) at 3.10 p.m. on April 29, when the heat lacked but 1.5 F of eclipsing the highest recorded in Manila

The mean humidity for the last ten days of April was \$9.9, but on the 18th and 23rd at the commencement of the present hot spell, it dropped as low as 33.0 caused by the entire absence of any moisture in the atmosphere, To-day started out with a west wind clusing slight relief, by eleven the thermometer registered 95.2. Three hours later, the mercury showed a tempera

Jules de Boseck, the man who was

arrested in London in connection with the retention of the Queen of Siam's pearls, and extradited to the Straits Stilements, arrived in Singapore recently by the P. HONGKONG, CANTON, and O. mail steamer Devanha, in charge of Chief Detective Inspector Bower, of Scot land Yard. The vessel was met by Chie Detective Inspector Nolan and Detective Taylor of the local force, who eccorted de. Boseck to the lock-up. Next morning he appeared in the police court and was formally remanded until Friday May 9, on bail of \$15,000. The charge against him will probably be one of relaining stolen property. Mr. L. E. Gaunt conducts the Typhoon Map Much Chong Bhakdi Ong Kwa), who was to receive the pearl-neckists for H. M. the Queen-Mother of Fiam which is alleged to have been stolen by de Boseck, has come to Bingspore with his family, to give evidence in the case against de Bosec in the Singapore Court.

BANKING OPERATIONS IN THE

Survey of Year's Work.

The nineteenth annual general meeting of the Mercantile Bank of India was held on April 2 at Winchester House, Old Broad Street, London, E.C., Mr. R. J. Black (chairman of the company) presiding.

The chief manager (Mr. James Campbell) read the notice convening the meet-

The Chairman said :- Gentlemen, have to express the regret of my colleague, Mr. Byrio, at being unable to be present at to-day's meeting, owing to short absence in India on business With your permission I will, as usual take the "report and accounts as, read, and before putting the resolution to the meeting for the adoption of same I have a few remarks to make. Last year though a very prosperous one for India as a whole, was but a normal one for banking, in so far as profits were concerned. The Bank rate in India on the average was much about the same as the provious year, but there was a long period of extreme case, when the employment of money, except at very bare margins, was difficult, and this naturally had effect on all banking operations. Added to this the revolution in China, as could only be expected, very much " restricted business; in fact, for some months trade was practically at a standstill. The outlook at the moment is improving, though slowly, and in time, if the newly created Republic is allowed peacefully to carry out its reforms and a stable and reliable Government is established, it cannot but have beneficial_effects on the country a whole and on the expansion of trade. Surveying, therefore, the situation generally from an Eastern bank's point of view, I look upon 1911 as moderate year. It opened with distinct promise, but in the second half of the year the incidents I have just mentioned

checked the prosperity of the year as THE PROFITS.

whole.

Every description of Banking and Ex-Taking everything into consideration, change business transacted, and Stocks however, I do not think we have very and Shares bought and sold on account of much to complain of in the results, as constituents. BILLS NEGOTIATED & COLLECTED. 81, 1910 (making 7 per cent. for th MAILS and TELEGRAPHIC REMIT year), as recommended in the report, be and the same is hereby confirmed. LETTERS OF CREDIT and DRAFTS Mr. J. A. Maitland seconded the regranted on all the principal cities in the

THE RESERVE YUND. Mr. Phillips, referring to the chairman's remark that the reserve fund must receive the board's first attention, said he thought that sometimes the shareholders should first receive considerstion. The dividend represented only a moderate return on the price that some of them had paid for their shares. Mr. Reginald Murrhy said lie was o opinion that the directors, in adding to the reserve fund, were giving considers-

tion to the shareholders interests in the best possible way. (Hear, Bear,) The chairman, in reply, expressed the view that in adopting the course they had dong the shareholders interests were recolving the bear parties attention He might coming them that whereas he bank a share word at mides on within But last least feets they were the

to the fact that they had a substantia reserve fund, However, Mr. Phillips's remarks would not be lost sight of, and whenever the board saw their way to increase the dividend; they would be happy to do so, Thoy must, however, adhere to their policy of first strengthening the reserves. The resolution was carried unanimous-

The chairman moved the re-election of Mr. J. A. Maitland and Mr. H. Mel-

. Sir David Yule seconded the motion and it was unanimously agreed to, the auditors, Massrs. Cooper Brothers and Co., and Messrs. W. A. Browns and Co., being also re-appointed. Mr. MacCawran proposed a vote

thanks to the chairman and directors, the

chief manager, and all the officers of the bank for their excellent conduct of the bank's affairs in the past year. He endorsed what had been said as to the importance of building up a big reserve. Mr. J. Macandrow, in seconding the motion, said he shared the opinion that it was highly advisable for the credit of the bank that they should continue adding to the reserve fund, and he for on would have been very sorry if the extra profits made during the period under raview had been simply applied in the payment of a bigger dividend. No doubt an increased dividend would come in time, but he thought he voiced the opinion of the shareholders generally in saying that, like himself, they were well

(Hear, hear.) The motion was carried unanimously. The chairman acknowledged the vote, and thanked the shareholders for the way in which they had identified themselves with the board's policy of building up

content to wait, for that eventuality.

The proceedings then terminated.

DIVORCE CASE IN SHANGHAL

A case which is believed to be unique of its kind, says the "N. C. Daily News!" of the 9th inst., is down for hearing at the Mixed Court to-day. This is divorce action between two foreigners. and the novel feature is that it is to be heard at the Court mentioned.

The circumstances in which it is being tried at the Mixed Court are peculiar. The parties are German, but it is understoud that they have disclaimed German jurisdiction, in which case, as they have no Consul, it falls to the Mixed Court to try the proceedings. In view of the circumstance that the parties were formerly under German jurisdiction, the German Assissor, will sit with the Magistrate. While foreigners have before this been tried for offences at the Mixed Court. this is believed to be the first time that a suit for divorce has been filed before. this tribunal at the instance of a

It may be noted that the Chinese section of the Mixed Court has to deal with quite a number of native divorce cases. These suits frequently arise out of police proceedings, and in cases when s wife has been convicted of theft or a similar offence, the filing of a suit for divorce by the husband is a common corollary. Other suits are filed on totally different grounds, among which may be mentioned such reasons as a quarrelsome disposition on the part of the wife.

The Kuals (Schngor) Rubber Company. Ltd., pays a final dividend of 25 per cent, making 1074 per cent for the year and carries forward 23,582. The estimate for the current year is 282,000 lbs. From the premium on shares 230,000 is appropriated forming a reserve equal to the total capital of the Company,

would not come forward as Presidentjul condidute in 1912. Poubtless, the volatile Colonel could justify his action on the ground that political affairs have so considerably altered since he made the statement, that he no longer feels called upon to adhere to it. Besides, statements of that sort, he probably believes, are mere rhetorical flourishes made on post prandial occasions, forgotten as soon as made and never

intended to be taken seriously. Such statements, however, should not be made by public men in responsible positions unless they are prepared carry thenrout. Far better that such statements should not be uttered. We are not referring to the consistency or the inconsistency of action: all we wish to convey is that public men should know their minds better before committing their future nctions to a definite course. Incon-

sistency, far from being the sign of an elastic moral code, may very easily be the reverse, and indicate a mind willing to take a broad, fair thoroughly impartial view, no matter what may have preceded. To many, however, it was by no means a surprise that the worthyrex-President ned launched himself into the midst of the election with all his wonted fervour. He would not have been the Roosevelt that we know had he Lady Chater not-acted in that maner; and that he is giving his opponent a very stirring

HONGEONG, WEDNESDAY, MAY 15, 1919.

THE AMERICAN POLITICAL STRUGGLE

Presidential Election America, Reuter assured us in a telegram yesterday, is, like the weather in Hongkong, "waxing hotter." That we would not doubt for a moment, for they don't mince matters in America. From the President downwards (if there is any "downward " scale of society in Democratic America!) the doctrine of "hustle" is firmly believed in in all departments of life; and in politics it may be stated without undue emphasis that no exception is made. From beginning sof the campaign up the present time, the sidential election has been conduct ed with great vigour, particularly by the two great central figures President Tuft and his redoubtable opponent, ex-President Roosevelt. Of the former, little need be said than that many of the wisest people, both sincerely hope that he will be returned 9.15 r.m. lif for no other reason than as I reward for the excellent services fre GET IT-TO-DAY, IT MAY SAVE has rendered during his tenure o office, not only for the benefit of

To-day's Court Proceedings.

A case of considerable interest was heard in the Suprome Court this morning by Mr. Justice Gompertz, the action being that in which Henry A. Law, Hongkong, claimed from "The Great Raymond" the sum of \$1,00). The claim areso out of an incident which occurred at the Theatre Royal on Saturday week. The illusionist challenged the audience to omulatchis foat of freeing himself from a pair of handcuffs. Mr Law

accepted the challenge, and claimed to have succeeded in freeing one hand. Raymond denied that Mr Law had earned the \$1,000 which he offered for the performance. of the feat, and there was a big "Scene in the theatre. Proceedings were at once instituted by Lieut. Law for the recovery

of the \$1,000. The writ stated "that the claim was for \$1,000, being the amount undertaken on was expecting to get the money, as a man the 4th May, 1912, to be paid by the defendants to any person who should free himself from a pair of handcuffs fastened upon his wrists by the defendent, which | was issued. act was performed by-the-plaintiff. The __Mr Goldring said he did not know who plaintiff's full claim would exceed \$1000 the emissory was, but this was certainly but he waives so much thereof as may be jurisdiction of this court."...

and Mr P. W. Goldring for the defendant. The great interest which the case has to a charity. aroused was evidenced by the large attendance at Court, many ladies also being present.

THE PLAINTIFF'S EVIDENCE. Henry Astell Law, the plaintiff, said he attended the evening performance on Saturday week at the Theatre Royal where the defendant was performing. He was sitting in the stalls and was one of committee of nine who went on the stage in response to Raymond's invitation. They in-50.00 | cluded several American sailors. Defendant 25.00 | chose a pair of American handcuffs from one 10.00 of the American sailors, and, having pre-5.00 viously stated his willingness to pay £100 1.00 to anyone who succeeded in freeing himself 1.00 from them, he asked Captain Warden to 1:00 put them on. Capt Warden refused, and 1.00 Raymond then passed them to witness. 5.00 He refused also but after being strongly 2.00 pressed, consented and Mr Raymond then 1.00 put the cuffs on witness. He put the cuffs L.DO on as tightly as they would go, the right 2.00 one hand being above the wrist bone. Witness was positive that both hand cuffs were clicked to. The defendant then renewed his offer to witness and further

> The handcuffs were produced to his Lordship, and Lieutenant Law explained their working. His Lordship said he thought plaintiff had better not put

stated that he would allow witness to have

Continuing his evidence, Lieut Law said he reached down to the keyhole and was able to drop the key into the lock He could then just reach it with the tips of his fingers, and he gave it a turn. Immediately 1.00 the left handcuff opened. Mr Raymond, 2.00 seeing that something was up, then rushed 1.00 at him like a tiger, seized his right hand 1.00 and they struggled together for a few 1.00 seconds. Eventually he quietoned down 2:00 and then witness noticed he was pressing 10.00 too knobe on the handcuffs. At the same 1700 time witness noticed that defendant had

broken the key. In answer to his solicitor, witness said 16.00 he was positive he did not break the key himself, and gobody also went near him. Raymond then said, withese continued, "You are not free yet. "Let me see you get-your other hand out. He answered 5.00 How can I; you have broken the key. 25.00 Witnessed then threw the broken key to 5.00 | Captain Ang. There was then an uproat-2.00 | the audience asking for fair play. Mr 5.00 Raymond then said he would return money 5.00 to people who were not satisfied and 5.00 several left. He also said "You are the 5.00 sort of something about people who try to 0.00 create ill-feeling between Great Britain 5.00 and America. Behind the stage with a pair 5.00 of pliers the handcuffs were opened. The .00 right handcuff was very hard to open, a 5.00 nick having to be made in the broken key. Witness then returned to his seat on the

Cross-examined—He knew nothing o handouffs and had never seen that sort 15.00 Mr Goldring asked Mr Law to put on the cuffs, and Mr Harris consented to this being done after defendants had given a

5.00 stage. He had not been paid the £100.

guarantee that Mr Law would be freed. Mr Goldring said part of his defence was left handcuff was never properly fastened. That accounted for Mr Raymond's tigorlike rush across the stage. A half-turn of the key should free both hands.

not done with Mr Raymond's authority. Answering Mr Harris the plaintiff said necessary to bring the action within the has positive that previous to turning the key in the Tock his left hand was not Mr M. R. Harris represented the plaintift free. The first thing next morning his s plicitor wrote offering terms of Settlement, of which one was that £20 should be given

> Lieut. Albert Neville Stopford, H.M.S. Rosario, spoke to going on the stage with plaintiff and others on the evening in question, and as to the offer of £100 made by defendant. Plaintiff did not wish to put on the bandouffs, but was finally per sunded to by defendant, who put them on him. They appeared to be Defendant repented his offer and gave plaintiff the key. Mr Law thee, in view of the audience, free his left hand, and then there was a scuffle botween Raymoud and plaintiff. Raymond said .. Free the other hand " and Mr Law said " How can you have broken the key." He went to the "Asahi." the report seems to be behind the stage to help to get the right

Cross examined : Plaintiff came near witness, but be did not touch the key. Captain Warden looked at the key. By Mr Harris: This was before it was given Lieut. Law Nobody touched it afterwards, until Lieut Law went behind

Captain Warden, K.O.Y.L.T., said he was asked to put on handouffs but refused. and be tried to persuade plaintiff not to. Mr Raymond went to him and said could see the handcuffs were closed. Witness ant at the side of the stage withothers of the Committee and saw Lieut. Law's left hand free. He saw Raymond rush at him and believed he seized his left hand. He heard Raymond say during the strugule something about the cuffs not having been properly locked, and also tell him to free s other hand. Lieut. Law said " How. can I : you have broken the key." was a good deal of booing at the the time. and it was difficult to hear. Witness freed plaintift from the right cuff and then re-

furned to the stage. In reply to questions by Mr Goldring, Captain Warden stated he thought Raymond said " This is not fair, let me fas en

His Lordship : You did not put those those words to the other witness. Mr Goldring said he overlooked it He suggested that there were three conditions: That the cuffs should properly fastaned, should be opened without assistance, and in full view of the audience .- Witness said he did not hear the conditions made until after Lieut. Law

had freed himself. Lieut, Stephen Winchester Wallace_is command of a United States gunboat, said the sailors on the stage were all from his ship. He was also there. One of the sailors carried a pair of handcutis, there were none similar to them in ship. So far as he could see the cuffs were put on Lieut. Law properly; they were supposed to snap on without difficulty. When Raymond rushed at plaintiff, plaintid tried to waive him, and a scuffle ensued He heard Mr Raymond say Lieut. Law had not freed his right hand and he believed Mr Raymond at that time persisted in his offer of £100 if he completely freed

Cross-etamined: The handcuff was not an American Service one but he had seen it used by the police in America; it was a well known pattern. He knew in a general way how they were used. heard Mr Raymond remark that the band cuffs were not properly locked. He did not bear the stipulation made that they should be so. Of handcuffs were in working order there was question about it provided they were put on p operly.

William Bruce Sweecy, 1st class - mechinist's mate in the U.S. navy, said he went to the theatre at the request of Mr Raymond's manager. He was asked to bring some shipmates and was given a free se .t. In the ante-room one of Mr Raymond's. attendants had handcuffs and straight jackets and asked them to take them on the stige when Mr Raymond issued the challenge. Witness went on the stage with a pair of handcuffs which looked like the pair produced. Mr Raymond chose them from him. He was n t experienced the handcuffs appeared to be put on Mr that the bandouffs were defective, and the Law properly. When the cuffs were put on Mr Raymond said he would give " gentleman £100 if he can free himself from the handcuffs without assistence. He saw. Mr Law with the key between the index firger of each hand and then the left cuff flow open. Mr Raymond got it tra temper.

In answer to Mr Goldring witness said on the previous evening he had taken handcuffs to the theatre from the ship. On was free Mr Raymond said "I will leave it to the person who brought the to the whather the looks are in By Mr Goldring Mr Raymond at the or not, and witness on being appealed to said the lock seemed opened very onelly. He did rot hear Mr. Raymend my liefore the handende were fight put on Mr. Law that the left handoul seemed so he out of order. of Raymond seemed to take a lot of time and trouble locking the ouff.

CHARGE AGAINST CHINESE CONTRACTOR

WEDNESDAY, MAY 15, 1912.

Bolero Mr Molbourne at the Magintmey this morning, a contractor named Un Law On was charged with blasting stone withont taking the necessary precautions during the construction of a new road from Chamberlain Road to Plantation Road if

Mr Edwards represented the Public Words Department, while Mr Linwis ap-Had you had a very fair dinner that peared for the defendant. Evidence, was given to the effect that Pr. Steadman was boing carried by his chair coolies of April 30th. when he heard a loud report as of blasting. A store drapped on to the road very near

The contractor in work said that the road had been pened since operations had been commenced." Up to May 3rt. blasting operations had been carried on on the new road. He said that in all Government contracts he had received unless a contract contained a stipulation as to blasting he always carried out blasting operations. He thought that all due procautions had been taken. He did not remember any occasion upon which stones had been blown from the scene of the blasting operations on to Plantation Reads

Defendant, was fined \$100 or three

THE ALLEGED DISCOVERY GOLD IN KYUSHU.

-Considerable sensation has been com lately by the alleger-discovery of an extensive deposit of gold in the neighbourhood of Yokohama, Yama district. Fukuoka prefecture. Some of the enthusiasts responsible for the report declare that the deposit excels even the Kilondike, and that gold exists in the neighbourhood to the amount o 2,000,000,000 kin These reports have been circulated by newspapers in Tokyo and Osaka, and recall the statements. made during the war of the discovery of rich gold fields, afterwards proved to bo false. According to a Fukuoka telegram-

more or less of a hear. Mr. Nods." Director of the Fukuoka Mining Inspection office, and Mr. Ishikawa, an export in the same office, who visited the scene of the alleged discovery, report that there is evidence to show that a gold mine was worked there about 150 years, ago, and it can be surmised that some gold was found there in olden times, but it is quite impossible to say how much gold could be obtained to-day or why the working was discontinued if the yield was productive. It is true that there is some placer gold there, but the quantity and extent of the deposit are entirely unknown. Many people have applied for permission for trial digging, but none has actually taken the operation in hand. Investigations have not progressed to such a stage as to decide whether the mine has any hopeful prospects at all, still less whether the deposit of gold is as rich as reported. Mr. Nishiwada, an expert in the Department of Agriculture and Commerce, did not go purposely to inspect the find as reported. He visited. the place on his way to inspect a colliery

in Fukuoka prefecture. The dispatch adds that people in Yame district and Fukuoka gity are solely occupied with this topic and cherish the most absurd ideas on the subject. Some talk of the national debt being redeemed, others that the excess of imports over exports is no longer a matter of concern, as the gold will pay for all. "Speculators have competed in sending in applications for grant of charters for trial digging, these applications now numbering 105. Mr. Hori Santaro, a colliery owner, has applied for the lease of 10,000,000 taubo. It appears the report of a gold discovery in this locality had its origin in the fact that Mr. Iwagaki, a mineralogist who was a teacher in the Kumamote Higher Technological School, resigned his office and, in concert with a building contractor in Kumamoto, applied to the authorities for permission for the survey or exploration of a gold mine in Yamo district. On this slender basis of fact the whole story arose .- "The Japan Chronicle."

A SULTAN'S CHAMPAGNE.

First Attempt At After-Dinner

Speaking. PARIS, April 3. The Franco-Moraccan Treaty signed at Rez on Saturday contains eight articles placing Morce m under the pretectorate of France, guarantening respect of the natives religious convictions and the prestige of the Sultan, providing for the military occupation of certain points by the French if deemed necessary, as d defining the powers of the French Resident-General and the basis of fin neisl rooman sation. Breaking through all traditions of the Moorish Court, the Sultan insisted on signing the treaty in person after the seal of the Empire had been lixed by the Haiib, or Minister of Justice. Although the Hajib was ill in bed on Saturday, he was made to get up wys the Matin's Lauredal correspondent of Fet and bearing an lokating, a new pen, and the State seal, was escorted with great pourp to the prerence of the Sulvan, with whom were M. Mokri, Moroocan Mini-tor for Foreign

In the evening the Sultan, who was in the best of humous, again broke traditions. by making bis deligh as an after-discer spaker at a gound improve which he gave at the palson to the French Mirsion. There was a breach meno, with champague, and M. Reguent a ked the Solan I he would allow him to propose his Majesty's health. The Saltan - prilingly assented, but repromoted Ben Chatrit, one of his en tournge, with not linving remoin ered this important formality as d with having allow

ed his Majesty to be caught unawarea, Male egnault made his speech, and then to the american of bloo a and foreigners to Sulvan Jespended sismained souted, but anhersons his impermuta speech, in which he remarked that he was -transcartomed to public speaking , reas worthy of their est, Eutopean traditions. "Garnier and Vallet, accomplian of the bandit Bonnet, who was shot by the Parisian police recently, have been tracked down and are being be--sieged in a house at Nogent-Sur-Marne, . They are firing on the pelice and the crowd, and a police sergeant has already been wounded and taken to the hospital.

THE BIG LOAN TO CHINA.

REPRESENTATIVE BANKIRS CONFESRING IN LONDON.

(Router's Service to the China Mail.)

LONDOY, May 14. The first meeting of the Bankers representing the Six Powers who are prepared to advance ±60,000,000 to China, is being held to-day at the British and Chinese Corporation offices, London.

M Versigners, the Director of the Russo-Asiatic Bank, has arrived in London to represent Russia. He immediately conferred with the Russian and Japanese Ambassadors. In an interview with Reuter's representative he stated that Russia had no political motives or aspirations beyond saleguarding her special interests in Mongolia

and Western Chica. The representatives of all the Powers felt strongly that political control of the vast sums of money in contemplation should take precedence of financial control; and held that it was most important that the bankers should act on decisions taken by the representatives of the Six Powers at Peking and .co-operate with them.

THE "TITANIC" INQUIRY.

(Reuter's Service to the China Mail. LONDON, May 14.

'At the resumption of the Inquiry to-day a searching investigation was -made as to whether the Californian was the vessel whose lights were seen from the Titanic when she was foundering. Witnesses, who had been on the Californian, gave evidence of seeing a vessel's lights, and afterwards rockets a few miles off, not far from the spot at which the Titanic actually struck. The Captain testified that he was resting at the time, and did not see rockets. There was only one white rocket, which was not a signal of distress. reported to him. He saw the ship from which it had been fired before he retired, and was positive that she was not the Titanic, which would have been unmistakable. He was unable, however, to indicate any other vessel to which it could have belonged as being in th locality at the time. If he ha thought she was the Titanic he would have made every offert to reach her though the danger may have been of the most serious nuture

An apprentice of the Californian testified that he saw a vessel which fired many rockets, and which seemed to be listing heavily on the starboard side.

For sale by all Chemists and Starskeppers. THE BOY REPUBLIC

Curious Selp-Governing Experi ment In Dorset.

Plana are being completed for the estabblishment on a farm in Dorset of a boy Republic with a Parliament and courts and police -- in short, a miniature State-all managed by its youthful citizens,

The scheme is an experiment in the education of boys and girls who at the present time are sent to industrial schools reformatories. It is in the hands of influential committee of which, Mr George Montagu is chalrman, including Mr Cecil Chapman, Lady Henry Somerset, Lady Elcho, Mr Mott Obsorne, who helped to found the first "George Junior Republic" in America fourteen years ago; and Mr Harold Large, who is to be the superintendent of the first one in Great Britain. The lease of a farm in Dorsetshire has been given rent free by the Earl of Sandwich for the undertaking, and it is hoped to make a start in the autumn.

Mr Montagu and Mr Harold Large, incerviewed on the scheme, said: "Our committee when complete will have eighty citizens, boys and girls of ages from 14 to 21. The idea is to foster the elements notions of independence, self-support, se government, and fair play. The communi is a miniature State for all practical pu poses. The head is a president, or
